## Staffing Options Offer Flexibility to Solve Your IT Challenges

### Strategic Staffing

GUNA has invested heavily in gaining access to talent sources and built an extensive network with IT professionals, industry businesses, and a wide range of sourcing services.

Our recruiters have more extensive experience with recruiting than the industry average, enabling them to build relationships and draw candidates from an extensive talent pool.

GUNA provides customers with experienced and certified technology professionals, temporary staff for special projects, or as backfill when one or more of your own techs are otherwise engaged. We are flexible and provide staffing for short or long-term assignments.

### Project-Based Work

GUNA can help your business execute any specific IT project when you lack the required staff or skill sets internally. We take a holistic approach to addressing your skill deficiency issue, as well as realizing your business goals.

From project assessment, design, testing, and delivery to overall project management, our team of consultants can be involved in every step of your project.

We support businesses that need help with a specifically defined project, such as equipment, installation and website development.

Our consultants can help install equipment; complete moves, adds, and changes; or respond to any short-term, specific requirement beyond the client's existing projects.

## Our Customer-Centric Approach Delivers Outstanding Business Outcomes

GUNA's highly skilled professionals are able to deliver results that fulfill your growing needs - often with the right to retain and hire.

Our clients represent all industry segments and are assured that they can depend on us for their IT staffing needs.

Our goal is very simple and client focused. We strive to keep your IT staff focused on business-critical technology initiatives and to ultimately help your company create a competitive advantage in the market-place.
